Essentials for getting started and building a cybersecurity program

AXON technologies

WHY
add Cybersecurity to your overall budget?

Strengthening cybersecurity is an important pillar for every organization to ensure the protection and safeguard of their critical assets, data and technology ecosystem from possible cyber threats and attacks.

AX ON technologies

WHEN
should you start?

It is highly recommended to start the soonest and ensure relevant reviews of the program are conducted on a regular basis.

AXON technologies

WHO
should be involved?

Everyone within the organization
has a role to play.

WHAT
is your level of risk?

While assessing your risk you should consider:

- Compliance with frameworks and standards

- Costs of a breach

- Assessing & strengthening maturity levels

AXON technologies

WHERE
to find help?

For organizations without in-house capabilities to build a cybersecurity program, look for professionals who can support to create, implement, and manage your program.
